Where to find narrative data?

НУГ Seminar 3
18 February 2020

Dr. Caroline Schlaufer, cschlaufer@hse.ru

Today's objectives

- Define what data we will include in our empirical analysis → according to clear criteria

- <u>Objectives</u>:
  - to collect the most relevant sources of the 3 debates
  - to have comparable data for the 3 cases

- Before we start: Each group summarizes the focus of their planned article
  - Research question(s)
  - Hypotheses

Meso level narrative data

- Meso level NPF research focuses on policy narratives from <u>policy actors</u>

- who are the relevant policy actors?
- Where / how do they communicate with the public?

Relevant actors

- Our assumption: An official (governmental) narrative and other narrative(s) countering official narrative
- The NPF separates actors into discourse coalitions: define the side of the debate according to policy positions (for or against a policy)

Relevant actors

Official narrative

- Moscow government and administration
- United Russia party members
- [Official media]

←

Counter narrative

- Non-systemic opposition members
- Systemic opposition members?
- NGOs
- Activist groups
- [Independent media]

Policy positions

For *renovatsia*	Against (this version) of *renovatsia*
For public transport reforms	Against (this version) of public transport reform
Solve the garbage crisis For increasing recycling, reducing garbage	Keep status quo For landfills, garbage storage

Scope

- Open questions:
  - What is our timeframe?
  - Governance level: do we only include Moscow city, Moscow oblast, or the federal level?
  - Only public debates or also closed debates?

Timeframe

- Most studies examine policy narrative over the known length of the policy debate

  - Sobyanin mayor since 2010
  - Start waste crisis ???
  - Start renovation program ???
  - New transport policy since ???

Governance level

Preference to work at the level of Moscow city only.

- For renovation: ok?
- For transport: ok? need to include oblast?
- Waste management: ?

Potential data sources

Governmental websites:

- www.mos.ru
  - Especially under "news" but also specific parts on our cases: e.g., transport, renovatsia
    - www.mos.ru/city/projects/renovation/
    - www.fr.mos.ru (*fond renovatsii*)
- "Participatory sites": www.ag.mos.ru, www.gorod.mos.ru & www.crowd.mos.ru
- Blog Sobyanin: www.sobyanin.ru/blog

Potential data sources

- Websites of NGOs
  - What would be the most relevant NGOs for your cases?

Potential data sources

- ## Social media (for both sides of the debate)
  - Facebook
  - Vkontakte
  - Telegramm
  - Twitter

- Should we mix social media and other (online) sources?

Potential data sources

- Media (available online):
  - "Official" media
    - E.g., moskva24
  - Independent media
    - Ekho moskvii
    - medusa

Potential data sources

- What about:
  - Public speeches?
  - Debates in gorodskaya duma?

- Should we include only text or also video?

What text from what source did you bring today?

In groups: make a list of the most important sources of narrative data for your case

Include both sides of the debate.

Put most important sources first.

Collection procedures

- ## We collect <u>all</u> data on the debates
  - In our timeframe from the selected sources
  - Afterwards we might have to exclude some text, if they are not a policy narrative (= do not contain a character)

- ## We start collecting with the most relevant sources

Who searches what?

Collection procedures

- We save all texts on google drive / drop box. One folder per case. You need to copy text or make a print screen into a world file

- We name the files in a folder according to certain rules

- We add each text in an excel file

How to name a file

1. Letter for your case
   - R = Renovatsia
   - T = Transport
   - W = Waste management
2. Number the documents
3. Your initals (First name, last name)
   - R1CS, R2CS…, T1CS
   - R1KZ, R2KZ…

	A	B	C	D	E	F	G	H	I
	document name	Link to document	Date document	Case					
	R1CS	www.ag.mos.ru/95.	23.05.2017	1					

Caroline Schlaufer   D1   ···

1 = renovatsia
2 = transport
3 = waste management

Next seminar

- Unitl next seminar you need to collect all the texts. We aim for several hundred texts.

- If you have problems meanwhile, write me and come and see me!

- 3 March or 10 March?

- 1 to 3 ok? Or better 3 to 6?
